

**CIS 180 L - Intro to JavaScript - Fall 2006
Homework Assignment #4**

Due: TUESDAY, September 5th, beginning of class

Purpose: To practice a few JavaScript events

Note: as long as you meet the specifications below, you may add additional embellishments as you wish.

How to turn this in: See instructions in #3 below - you will e-mail me the URL's for your completed pages.

1. Create an HTML page that does something when either an **onload** or **onunload** event occurs. (Your choice of what! It can be simple or fancy.)
2. Create a second HTML page that does something when either a **mouseover** or **mouseout** event occurs. (Again, your choice of what, either simple or fancy.)
3. When your pages are ready, send me an e-mail to **sharon.tuttle@humboldt.edu** before the deadline with **CIS 180 JS HW 4** in the Subject: line containing the URL's for your two pages.
