CIS 450 - Project Handout 2
Milestone 2

This is the second of several handouts related to the CIS 450 team course project. This second handout gives the next project milestone.

You now have a team project scenario -- now, you need some information from users to proceed. Each team is going to serve as example "scenario members" for the other team (supplemented by me).

Project Milestone 2

You will be sent the scenario descriptions of your team and the other team as they end up at the end of class on November 17th.

Then, you are going to act as members within the other scenario.

For EACH of at least 3 classes of scenario members, describe an example (fictitious) of a person in that class of users (name, position in the scenario). Then, describe:

1. What are three things you do, day-to-day, within this scenario? Give specific examples of regular activities.

2. What are three problems you face, day-to-day, within this scenario?

3. What are three things you wish were easier?

Milestone 2 deadline:

By 11:59 on **Wednesday, November 30th**

How to submit:

• Submit the materials described below using `~st10/450submit` on **nrs-projects**.

• (This may be submitted by any team member from their personal nrs-projects account, or it may be submitted from your nrs-projects team account, described below.)

Milestone requirements

• Submit the above information in a file `450-team-num-milestone-2.pdf` by the deadline above.
